

## **What Other Investigators Think**

**Mark Amaral CFEI**  
**Deputy Fire Chief**  
**Fire Marshal**

*"Coming from a small fire department our firefighters are tasked with many jobs such as fire inspectors and fire investigations. Having the 921Docs program has improved the fire investigation reporting 100%. All investigators reports are laid out in the same formats marking sure the investigator covers all aspects in NFPA 921. I would highly recommend this program to private and public agencies".*

**Steve Walton**  
**Fire Captain / Fire Investigator**  
**Executive Officer, Fire Investigation Task Force Leader**

*"921Docs.com is a must for All Public Agency Fire Investigators! The platform has not only increased the quality of our reports but it has closed the gaps in our reports and helped us comply with NFPA 921 & 1033.*

*921Docs.com has increased the quality and professionalism of our fire investigation documentation. It has also provided a uniform format and platform that has brought our fire investigation work product into the 21st. century. We couldn't have united our multi agency task force's report writing without your report modules as the foundation of our reports!*

*921Docs.com is a game changer for public agency fire investigators! Not only increasing quality, accuracy and producing professional reports it has increased productivity and decreased time spent on documenting the fire scene. Once we used 921Docs.com we couldn't go back to our old style of report writing! Thank you 921Docs.com".*

**Gerry Kelly CLGM, CFEI, CVFI, IAAI-FIT**  
**Deputy Fire Chief**  
**City of Leduc Fire Services**

*"The City of Leduc Fire Services has been using the 921docs program since 2014 and have found it to be an invaluable asset to the fire investigation unit. The program provides consistency and continuity while allowing individual investigators to express their findings in their own words. The program facilitates the investigator to input all information observed and documented at a scene seamlessly.*

*In addition; the program reduces interruption of the thought process by allowing the investigator to attend to other priorities and return to the program where he or she left off without losing situational awareness in the report. What is also beneficial about the program is its customization where our departments' requirements can be built in to the program providing a professional look and feel to each report".*
